EMBEDDED PLATFORM INTEGRATION

To: Hiring Manager
Date: 18 July 2026
Subject: Application for Embedded Platform Integration and Release Engineering Role

PROFILE FIT

- 12+ years in automotive software integration across ADAS and ECU programs.
- Hands-on delivery ownership from platform integration through release readiness.

VALUE OFFERED

- ASPICE SWE.5-aligned pipelines with traceability and quality gates.
- Cybersecurity-aligned releases with TARA and ISO/SAE 21434 evidence support.

COVER LETTER

Dear Hiring Manager,

I am applying for the Embedded Platform Integration and DevOps role at your Organisation. In my current role at AUMOVIO (Continental), I lead multi-variant software integration and release delivery using C/C++, Jenkins/CloudBees, Docker, Kubernetes, Artifactory, and Python automation.

I focus on building predictable, auditable, and secure release workflows for distributed teams. My experience includes secure OTA/SOTA packaging, dependency governance, and cross-functional coordination to ensure stable and compliant delivery outcomes.

I would welcome the opportunity to discuss how I can support your upcoming platform and release milestones.

Thank you for your consideration.

Sincerely,

Vinod Kumar Neelakantam
