ASPIRING FUND MANAGER | LONG/SHORT EQUITIES PORTFOLIO MANAGEMENT

To: Hiring Manager

Date: 12 September 2026

Subject: Application for Fund Manager / Portfolio Analyst - Long/Short Equities Role

PROFILE FIT

- 10+ years across leading automotive/embedded companies (Volkswagen, Daimler, Fiat/Chrysler, Bosch, Continental) - direct and indirect exposure to how large, multi-industry organizations operate and manage risk.
- Completed the ITPM Professional Trading Masterclass (2022), trained hands-on alongside industry practitioners in L/S equities, macro, and risk frameworks.

VALUE OFFERED

- Engineering-grade analytical rigor and data-driven decision-making applied to portfolio and risk analysis.
- Genuine cross-industry perspective on manufacturing, supply-chain, and technology cycles that inform sector-level investment judgement.

CURRENT ROLE FOCUS

- Fund Manager / Portfolio Manager - Long/Short Equities
- Research Analyst - Cross-Industry Equity Research
- Trading Associate - Systematic & Discretionary Strategies

COVER LETTER

Dear Hiring Manager,

I am applying for a Fund Manager / Portfolio Analyst role focused on long/short equities. Over the past decade, I have built and validated complex systems across leading automotive and embedded-technology companies - Volkswagen, Daimler, Fiat/Chrysler, Bosch, and Continental among them - giving me direct and indirect exposure to how large, multi-industry organizations operate, invest, and manage risk.

I am now channeling that depth of cross-industry, data-driven experience into a new direction: wealth and fund management. I trained hands-on with industry practitioners through the Institute of Trading & Portfolio Management (ITPM) Professional Trading Masterclass (2022), studying the same macro, sector, stock-selection, portfolio-construction, and risk-management frameworks used by professional long/short fund managers.

I believe the combination of engineering-grade analytical rigor, genuine multi-industry exposure, and dedicated markets training gives me a distinctive foundation for a fund/portfolio management career - the same discipline used to validate mission-critical systems, now applied to evaluating companies, sectors, and portfolios.

I would welcome the opportunity to discuss how this background can contribute to your team's investment process.

Thank you for your consideration.

Sincerely,

Vamsi Krishna Sai Kavety
