SKILLS

Test & Validation
HIL rigs (Vector VT System, RT Rack), Fault Insertion Unit (FIU), CANoe/CANalyzer, LabVIEW TestStand

Embedded Programming
C/C++, Python, Shell

AUTOSAR & Config Tools
DaVinci, EB Tresos, ARXML files

CI/CD & Test Automation
Jenkins, Git/Gerrit/GitLab, Jira, Continental ATP/TEMPPO

DevOps & Cloud
Docker, Kubernetes, Terraform, Ansible, AWS, Azure

Debuggers
Lauterbach/Trace32, JTAG, PE micro MULTILINK, ICAS1 Debugger

Automotive Protocols
UART, CAN, RS-232, RS-485, UDS

Standards & Process
ASPICE (HWE.2, HWE.3, SWE.5), ISTQB Foundation, Agile/Scrum

CERTIFICATIONS

ISTQB Certified Tester - Foundation Level (CTFL)

Vamsi Krishna Sai Kavety

HIL/SIL TEST ENGINEER | EMBEDDED SOFTWARE INTEGRATION

To: Hiring Manager

Date: 10 September 2026

Subject: Application for HIL/SIL Test Engineer / Embedded Software Integration Role

PROFILE FIT

- 11+ years in automotive embedded HIL/SIL testing and software integration for VW, Daimler, and Fiat/Chrysler OEM programs.
- Hands-on HIL rig ownership: Vector VT System, RT Rack, Fault Insertion Unit (FIU), CANoe/CANalyzer, LabVIEW TestStand.

VALUE OFFERED

- AUTOSAR-based gateway/telematics/body ECU integration with ASPICE (HWE.2, HWE.3, SWE.5)-aligned processes.
- Automated regression and fault-injection testing with Python/LabVIEW, plus growing DevOps/cloud tooling (Docker, Kubernetes, Terraform, Ansible).

CURRENT ROLE FOCUS

- HIL/SIL Test Engineer - Automotive ECU & Gateway Platforms
- Software Integration Engineer - AUTOSAR/Gateway/Telematics Systems
- DevOps-Aligned Test Automation Engineer - CI/CD & Cloud Tooling

COVER LETTER

Dear Hiring Manager,

I am applying for the HIL/SIL Test Engineer / Embedded Software Integration role at your organisation. In my most recent role at Manu Dextra/Vitesco Technologies, I maintained and upgraded HIL test rigs (Vector VT System, RT Rack), designed Fault Insertion Unit (FIU) tests to verify ECU diagnostic behavior, and automated regression suites using LabVIEW TestStand and Python.

Earlier in my career, I integrated Gateway Control Units (ICAS1/ID.3) and Telematics/Body Control modules for VW and Daimler programs using AUTOSAR tools (DaVinci, EB Tresos) within Agile/Jenkins CI/CD environments, and applied ASPICE (HWE.2, HWE.3, SWE.5)-aligned processes throughout.

I bring strong debugging and diagnostics experience with Lauterbach/Trace32, JTAG, and PE Micro Multilink tools across CAN, UART, RS-232, and RS-485 interfaces, along with a growing DevOps and cloud skill set (Docker, Kubernetes, Terraform, Ansible, AWS, Azure) that I am actively expanding alongside a postgraduate program in Data Science & AI.

I would welcome the opportunity to discuss how my HIL testing and embedded integration expertise can support your team's platform validation goals.

Thank you for your consideration.

Sincerely,

Vamsi Krishna Sai Kavety
