

Skills

Portfolio & Risk Analytics:
Asset return distributions, OHLC/realized/implied volatility across equities, currencies, commodities, rates

Macro & Portfolio Strategy:
Top-down macro & liquidity analysis, sector/stock selection, L/S portfolio construction

Risk & Performance:
Preventative & reactive risk management, Kelly Criterion, Sharpe/Calmar/Sortino ratios

Cross-Industry Exposure:
10+ years across automotive OEM and Tier-1 programs (Volkswagen, Daimler, Fiat/Chrysler, Bosch, Continental)

Analytical Discipline:
Data-driven decision-making and root-cause rigor from regulated engineering environments

Tooling:
Python/Excel for data analysis

Vamsi Krishna Sai Kavety

ASPIRING FUND MANAGER | LONG/SHORT EQUITIES PORTFOLIO MANAGEMENT

Personal Information

- **Nationality:** German
- **Education:** Master of Science - Automotive Software Engineering — TU Chemnitz, Germany, 2018; PG Program - Data Science & AI (pursuing) — ExcelR, India, 2024-Present
- **Languages:** English - C1, German - B1
- **Driving License:** Class B/BE

About Me

- Over a decade building and validating complex systems across leading automotive and embedded-technology companies - Volkswagen, Daimler, Fiat/Chrysler, Bosch, and Continental among them - giving direct and indirect exposure to how large, multi-industry organizations operate, invest, and manage risk.
- Now channeling that depth of cross-industry, data-driven experience into a new direction: wealth and fund management.
- Trained hands-on with industry practitioners through the Institute of Trading & Portfolio Management (ITPM) Professional Trading Masterclass (2022), covering the same macro, sector, stock-selection, portfolio-construction, and risk-management frameworks used by professional long/short fund managers.
- The combination of engineering-grade analytical rigor, genuine multi-industry exposure, and dedicated markets training is the foundation of a distinctive profile for a fund/portfolio management career.

Core Competencies

- Long/Short Equities Portfolio Management: asset return and volatility analysis, portfolio construction, beta and position sizing.
- Top-Down & Macro Analysis: liquidity and macro indicators driving portfolio direction and asset selection, including U.S. equities and ADRs.
- Sector & Stock Selection: blending quantitative/fundamental and technical analysis for trade idea generation.
- Risk & Trading Discipline: preventative and reactive risk management frameworks, disciplined trade idea formatting.
- Performance Measurement: Kelly Criterion, Sharpe/Calmar/Sortino ratios, track-record management.
- Cross-Industry Insight: a decade of hands-on exposure across automotive, powertrain, and embedded-electronics OEMs and suppliers, offering investment-relevant perspective on manufacturing, supply-chain, and technology cycles.

Certifications

- Professional Trading Masterclass Video Series - Institute of Trading & Portfolio Management (ITPM), 2022
- ISTQB Certified Tester - Foundation Level (CTFL)

Current Role Focus

- Fund Manager / Portfolio Manager - Long/Short Equities
- Research Analyst - Cross-Industry Equity Research
- Trading Associate - Systematic & Discretionary Strategies

Work Experience

Software Engineer/Test Engineer - HIL (VW)

Manu Dextra / Vitesco Technologies - Regensburg

Jul 2021 - Mar 2024

- Owned test operations for Volkswagen ECU programs, working closely with global engineering teams under demanding production timelines.
- Introduced automated reporting that gave leadership real-time visibility into program health - early practice in turning complex data into decision-ready insight.

Software Engineer - Vehicle Testing

Manu Dextra / Continental Automotive - Regensburg

Aug 2019 - Jun 2021

- Validated the Volkswagen ID.3 Gateway Control Unit across every release cycle, coordinating across cross-site teams and Tier-1 supplier Continental.

Software Engineer/Test Engineer - ECU Verification

IPN Brainpower / Continental Engineering Services - Nurnberg

Feb 2018 - Apr 2019

- Verified powertrain control units for automotive Tier-1 programs, performing root-cause analysis on complex system-level issues.

Master Thesis Candidate

Conti Temic Microelectronics GmbH (Body & Security) - Markdorf

Jul 2017 - Dec 2017

- Researched over-the-air update delivery for automotive service networks - early exposure to how technology rollouts affect large-scale fleets and dealer networks.

Student Intern - Testing

ADC Automotive Distance Control Systems GmbH - Lindau/Ulm

Jan 2017 - Jun 2017

- Automated vehicle component testing and validation tasks, building an early foundation in data-driven, standards-based analysis.

Senior Hardware Engineer / Senior HIL Test Engineer - Power Train

Robert Bosch Engineering - Coimbatore, India

May 2011 - Mar 2014

- Led powertrain ECU integration for global OEMs including Fiat/Chrysler, coordinating directly with Bosch Germany - broad exposure to international manufacturing and supplier ecosystems.

Engineer R&D

McML Protection Technologies - Hyderabad, India

Jul 2009 - Apr 2011

- Built and validated hardware/firmware prototypes from the ground up in an early-stage R&D environment.
